TAIT RADIO COMMUNICATIONS

INVEST IN SERVICES

Choosing a radio communications solution is challenging. Specifying the right equipment for the task is only the beginning. There are many complex factors to be considered such as coverage planning, migrating legacy systems, leveraging current radio assets, network availability, ensuring positive user adoption, providing interoperability and managing upgrades.

Work with Tait to ensure your success

Tait has resolved these issues for hundreds of organisations around the world, ensuring an effective solution and successful outcome. Using standard and customised products, Tait integrates these to provide a system solution that fits your requirements. Tait has done this by illustrating what it means to develop truly customised solutions.

Get the most from your radio solution

Rest assured Tait can coordinate the necessary third party resources to complete the project. Tait will work with you to assure that your needs are fully understood and risks minimised. When you source services such as consultancy, project management, training or 24-hour support from Tait, you will secure valued guidance from an enduring partner. Tait can deliver the full benefits you expect from a new radio system throughout its lifetime of operation.

Your enduring partner

Support services from Tait add value by ensuring you get the most from your communications solution: lowering cost of ownership and mitigating risk factors. Tait has been designing, supplying and supporting radio solutions for 40 years, often customising a solution to suit a specific need. From the outset, our experts can help you define your requirements.

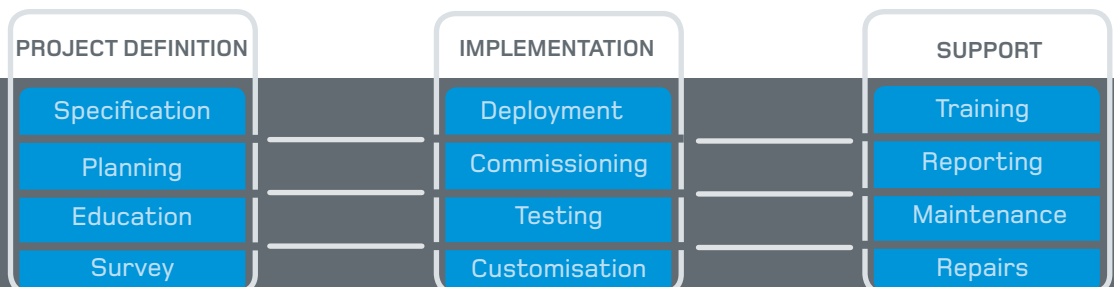

System deployment

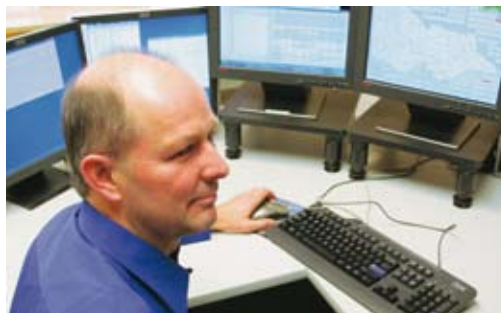

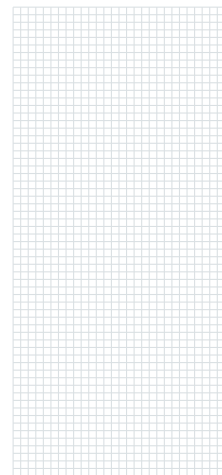

Tait will design and deploy a radio solution that includes a complete system build, full system testing and on-site commissioning while working alongside your current, third party or legacy equipment.

Coverage assurance

Tait engineers will design a solution using advanced mapping and prediction tools, which gives you certainty that your staff can be reached. We will co-ordinate with partners and integrators to ensure the best solution for your needs.

TOTAL SERVICES PACKAGE

Tait Custom Integration

Organisations choose to partner with Tait because of our ability to customise solutions. 'Customisation' not only applies to our products, but also to Tait's approach to a project – a company-wide philosophy that you will benefit from.

Comprehensive monitoring

Tait provides proactive and efficient issue analysis and problem resolution for all communication networks via real time system monitoring, 24-hour support and emergency on-site management.

Seamless updates

To keep your technology current, system and software updates and upgrades are deployed remotely by our Tait experts or installed on-site by your system support team.

Enhanced back-up

Tait can house and maintain a replica model system that mirrors your solution. Our staff will provide an even more efficient response to troubleshooting queries.

Repair services

Tait offers guaranteed response and repair times for both network and subscriber equipment. In addition, Tait has spares of critical hardware and software components to put right any unlikely faults with speed and efficiency.

Customised learning

Tait will increase your staff productivity with valuable tutorials ranging from basic radio awareness to advanced system concepts.

Professional educators

Our qualified and experienced instructors tailor comprehensive lessons to your needs at your site or in our classrooms.

TAIT: THE RIGHT FIT
